

[From Solar Energy Solutions Website (onforcesolar.com)]:

OnForce Solar develops, designs, engineers, finances, installs and maintains solar energy systems. Implementing solar is an intelligent way to reduce or eliminate your fixed energy costs while establishing a predictable long term cost of energy. It's also most efficient to produce energy closest to where it is consumed. When you couple the notable financial returns of solar energy with the vital environmental benefits, the case for solar becomes exceptionally compelling for any consumer of energy. As an independent energy consulting and solar integration firm, OnForce Solar has a dedicated and highly experienced team that is committed to providing our customers with the smartest, highest-quality and most efficient solar energy systems available.

Commercial Solar Solutions

OnForce Solar designs, engineers, finances and installs customized solar energy systems for businesses. We handle all applicable permits, rebate processing, and administration, providing a truly turn-key seamless solution. Deploying a solar energy system will dramatically reduce your fixed energy costs, increase predictability, and have an immediate positive impact on your operating cash flow. You'll also benefit by hedging against rising energy prices and increased property value. Our key commercial staff all have MBAs, and are experts at creating optimal finance structures based on your specific tax circumstance and geography. We help ensure you will receive full advantage of all available government incentives, and walk you through the financing options that best suit your objectives. In most cases we can offer a solution allowing businesses to implement solar without any out-of-pocket expense.

Utility Scale Solar

OnForce Solar works with property owners, municipalities, financiers, developers and utility companies to develop large scale solar systems. Developing a utility scale solar project and seeing it through to commissioning is a complicated process that requires a strong partner with the right experience. OnForce has this experience. We have a deep network of capital sources seeking projects. If you have a project you think may be viable for funding, please request from us a non-disclosure agreement to initiate the due diligence process in confidence. We provide the following services to help ensure project success:

- Site inspection and development
- Topographical site survey
- Lease agreements
- Building permits
- Intertie agreements
- Off-taker development
- PPA negotiation
- Due diligence
- Financial modeling
- Pre/Construction financing
- Structuring of debt and equity
- Tax and insurance planning
- Contract negotiation
- Project placement as a standalone project or as part of an overall portfolio

Incentives in New York State: The NYSERDA Program NYSERDA offers Property owners a rebate up to \$75,000 of the solar System's installation price. This rebate can be paid directly to OnForce Solar, thereby lowering your cash outlay for the system. Federal Tax Credit 30% of the gross installation price minus the NYSERDA rebate. Accelerated Depreciation (5-yr MACRS) with 50% Bonus Over 75% of the cost of the system can be depreciated in the first year. This is an extremely powerful incentive for those with the tax appetite to utilize deductions. - See more at: <http://www.onforcesolar.com/commercial.html#sthash.cdr1h5FC.dpuf>
